Cement

Portland cement {CLASS : SEM 1 42.5 N}

Portland cement {CLASS : SEM 1 52.5 N}

American specification cement, Bulk and packed according to customers request.

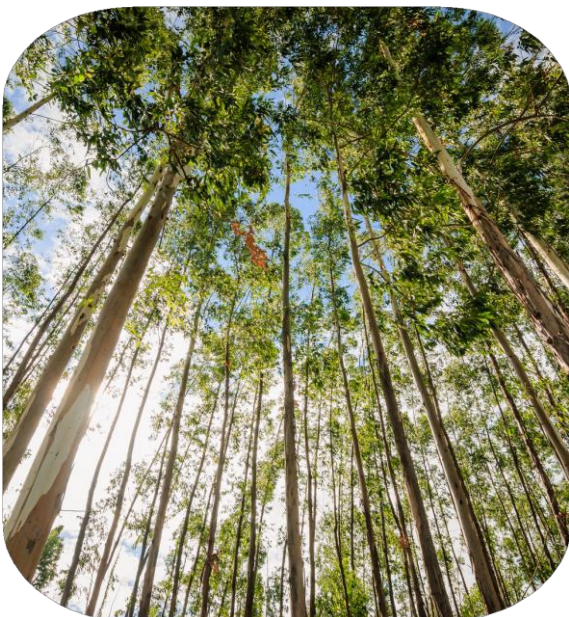

ROCKSALT - SEASALT -

- All the best types of industrial and food sodium chloride salt.
- (Raw salt for removing ice - Siwa salt farming salt- Superfine powdered salt -Fine salt (table) - Coarse salt (kitchen) - Tablet salt -and other types according to customer needs,,,,,,
- ORIGIN: Egyptian

WOODS

EUCALYPTUS WOOD

Brazil is a world reference in the cultivation of eucalyptus, being among the main producers of cellulose, paper and wood panels. The Brazilian sector has the highest productivity, measured in volume of wood produced per unit of area per year, and the lowest rotation in the world, which is equivalent to the time elapsed between planting and harvesting trees. The planted tree sector in Brazil, led by eucalyptus cultivation, represents 1.3% of gross national GDP and 6.9% of industrial GDP, generating more than 513 thousand direct jobs and around 3.8 million indirect jobs. We are the second largest pulp producer in the world, after the USA. The largest market pulp company in the world is Brazilian, resulting from the merger of the giants Fibria and Suzano

WOODS

PINE WOOD

Pine wood is a resistant and economical material that can be used in the manufacture of various items. In addition, it is a reforestation wood, which makes it a sustainable option. Pine wood is extracted from the pine tree and is widely used in the manufacture of furniture and houses. It is a reforestation wood, which has high durability, resistance and a good cost-benefit.

TECA WOOD

Teca wood has become increasingly famous in the world of furniture and decorative objects. There are several reasons for this, starting with its excellent quality, which ends up drawing a lot of attention from manufacturers! Teak wood comes from a tree known as *Tectona grandis*. Its occurrence occurs mainly in forests located in the Asian region of the planet. You can easily find this tree in places like India and Japan

CHARCOAL

"Charcoal is obtained from the burning or carbonization of wood, after this process results in a black substance. In everyday life, charcoal is used as fuel for heaters, fireplaces, barbecues and wood stoves, in addition to supplying some industrial sectors, such as steel mills. Charcoal is also used in medicine, in this case called activated charcoal from certain soft and non-resinous woods."

If u want to deal with EL Nakheel Company first send your id proof.

We are really looking for genuine buyers. Of course we can give the best prices which it can't get anywhere in the world..

To : EL Nakheel For Trading

Attention: - Dr. Mohamed Salem ,

LETTER OF INTENT

for any commodities requirements

For easy checking please indicate the following details

1) Product Name

2) Specifications

3) Quantity order (please specify if spot deal or 12 months contract

4) Delivery: Specify if FOB or CIF, if CIF need port of destination

5) Packing

**6) PAYMENT TERMS: (DLC MT700) at sight from 50 top bank ,
DLC OPERATIVE, ISSUED AS IRREVOCABLE, TRANSFERABLE ,
UNCONDITIONAL, Confirmed**

-Third party bank DLC not acceptable*

Please include the above details on the LOI

***The LOI should on pdf format,with the date of the day and sign by
end buy himself or the CEO of the company***
